Versatex by PolySoft is a highly resilient surface solution best suited for areas that require a impervious, attractive, slip resistant tactile finish. It is suitable for both dry and wet applications and can only be installed over concrete or an approved hard surface (AHS). Versatex has a multitude of application possibilities to benefit both leisure and commercial recreation markets. It would be well suited for indoor and outdoor pool surroundings, amenity rooms, showers and changing rooms. As well as directional pathways, rooftops, food processing work areas and commercial shops.

Benefits

- The strong chemical bond between the particles ensures superior lateral strength.
- The surface temperature is cooler than traditional finishes such as concrete, asphalt and rubber.
- Provides an excellent anti slip rating for both wet and dry applications.
- Hygienic and easy to maintain.
- Colorfast technology, protects against premature fading.

Specifications

- Can only be installed over concrete
- Strong chemical bonds ensures superior lateral strength
- Requires trained installation crews to ensure product meets safety requirements
- Impervious, attractive, slip-resistant tactile finish
