EASILY CONTAINED	Yes
LIFETIME COST	\$\$
LONGEVITY	5-10 Yrs
WARRANTY	10 Yrs

We offer a full selection of tiles to meet your site-specific needs. Tiles are available in your choice of pigmented rubber top. Rubber tiles offer superior shock absorption, low maintenance, long wear, and accessibility. They are also perfect for indoor applications in addition to outdoor since there is no on site mixing required.

Our Standard Tile utilizes adhesive to firmly lock each tile into place. We also offer an interlocking tile as well, which utilizes a metal pin system to reduce alignment shift, corner lift, and strain on tiles.

## Benefits

- One of the highest impact attenuation ratings
- Affordability
- Soft-touch, splinter free, & slip resistant
- Won't blow away or over-compact
- Mold, animal, and insect resistant
- Installed with proper drainage, does not freeze in cold climatic conditions

## Specifications

- Use wear mats to reduce displacement in "kick out" areas
- 12" x 12" Cross-Hatch Pattern
- Interlocking Pin System reduces alignment shift.
